Disable Useless SUID and SGID Commands

Find

```
find / -path /proc -prune -o -type f \( -perm -4000 -o -perm -2000 \) -exec ls -l {} \;
```

Unset UID

```
chmod u-s /path/to/binary_file
```

Unset GID

```
chmod g-s /path/to/binary_file
```

Find World-Writeable Files

```
find / -path /proc -prune -o -perm -2 ! -type l -ls
```

Mount data partitions

Block execution of programs, device files or setuid bit

```
/dev/sda5 /nas ext4 defaults,nosuid,nodev,noexec 1 2
```

To prevent privilege-escalation and arbitrary script execution create a separate partition for /tmp and mount it as nosuid, nodev and noexec.

```
/dev/sda6 /tmp ext4 defaults,nosuid,nodev,noexec 0 0
```

Disable Ctrl+Alt+Del

```
# systemctl mask ctrl-alt-del.target
```
