Micro Cloud (Hybrid) Architecture DRAFT

Disposable HW and SW architecture requied! Vendor-lock-in may be kept at minimum levels. SDDC (Software-Defined Data Center): A data storage facility where networking, storage, CPU and security are virtualized and delivered as a service. Stable, cheap, good enough.

Tier	Description
I	A Tier 1 data center is a basic server room implementing the general guidelines for computer system installations. This first level runs within a 99.671 percent availability through one non-redundant distribution path with non-redundant capacity components.
II	A Tier 2 data center Includes all requirements of Tier 1, plus a guarantee of 99.741 percent availability with redundant site infrastructure capacity components.
III	In addition to fulfilling requirements of Tiers 1 and 2, Tier 3 data centers provide dual-powered IT equipment to receive data from multiple independent distribution paths with an increased availability of 99.982 percent guaranteed.
IV	Tier 4 data centers include the components of the first three Tiers with the addition of independently dual-powered cooling equipment. The site infrastructure is fault-tolerant with distribution capability and the capacity to store electrical power. An availability of 99.995 percent is guaranteed.

Postgresql	Yes	Yes	may
Citus	No	Yes	may

Software Stack

Cloud Core Infrastructure (IaaS)

Type	Cloud Service Description	CPU support
Compute Nodes and Management	**AWS EC2 replacement with cloudinit support**	**ARM support**
Openstack	Full, but as LEGO style	YES
Proxmox	Light, but EASY to implement	YES
	– LXC may deploy container templates – both have native CEPH support	
SD Storage (Object, Block, File) Scaleout	**AWS S3 compatible and EBS replacement**	
AWS EBS - CEPH SD Block Storage	Hyperconverged or PetaSAN	YES
AWS EFS - CEPH SD File Storage	Hyperconverged or PetaSAN	YES
SD Load Balancer, Cache	**AWS ELB / Citrix Netscaler replacement**	
NGINX	or AlibabaCloud clone	YES
Integration + Enterprise Service Bus	**IBM WebSphere replacement**	
WSO2 Integrator		YES
Mass webhosting		
ISP Config		YES
MQTT Platform	**AWS IoT core replacement**	
Mosquitto		YES
Cloud Data Synchronization / Backup		
Rclone		YES
Restic		YES
Infrastructure Monitoring System	**AWS CloudWatch replacement**	
NetXMS		agent only
Grafana		YES
Kubernetes Orchestrator	**AWS EKS replacement**	
Mikro K8s		
Microsoft Windows	**Windows Infrastructure**	**$$$ not recommended**
1x Datacenter - dedicated HW	Xx Server Standard on KVM	no/LIMITED
XXX users	CAL (client access licence) per user	
		Cloudinit for Windows

Deployment

Ansible
Terraform
Juju

Security as a Service (SECaaS)

Type	Cloud Service Description	CPU support
WAF (Application Firewall)		
OWASP® ModSecurity	+nginx connector	YES
SD Firewall	**AWS VPC, Security groups replacement**	
Integrated firewall with templates	inside hypervisor	YES
pfSense	+platform integrated (VPS sandboxing)	LIMITED

Software as a Service (SaaS)

Type	Info	Service Description	Location
Services and Management	**API catalog**	WSO2 API Manager	KVM or LXC
DB	PostgreSQL	CitusData (Sharding Cluster)	KVM or LXC
DB	PostgreSQL	Postgresql	KVM or LXC
DB	PostgreSQL	Neon	KVM or LXC
DB	MariaDB	MariaDB with GalleraCluster	KVM or LXC
DB	AWS DynamoDB replacement	ScyllaDB Alternator	KVM or LXC
Storage	AWS S3	Ceph version	CEPH Cluster
Storage	AWS S3	Minio version	Minio Cluster

Platform as a Service (PaaS)

Type	Name	Service Description	Location
Web Publishing	Info	Wordpress	ISPConfig
Web Storage	Network Drive	NextCloud * can use AWS S3	ISPConfig, LXC or KVM
Videoconferencing	Talk	Talk * WebRTC	Inside Nextcloud + coTurn Server
Bug Tracking	Bug Tracking	Mantis Bug Tracker	ISPConfig
Forum	Discussion Forum	VanillaForums	ISPConfig
Knowledge Base	Wikipedia	DokuWiki	ISPConfig

* WebRTC is decentralized protocol it may needs some help from CDN

Cloud-Init

KVM - Virtual drive with configuration
LXC - scripts for distribution executed directly in container

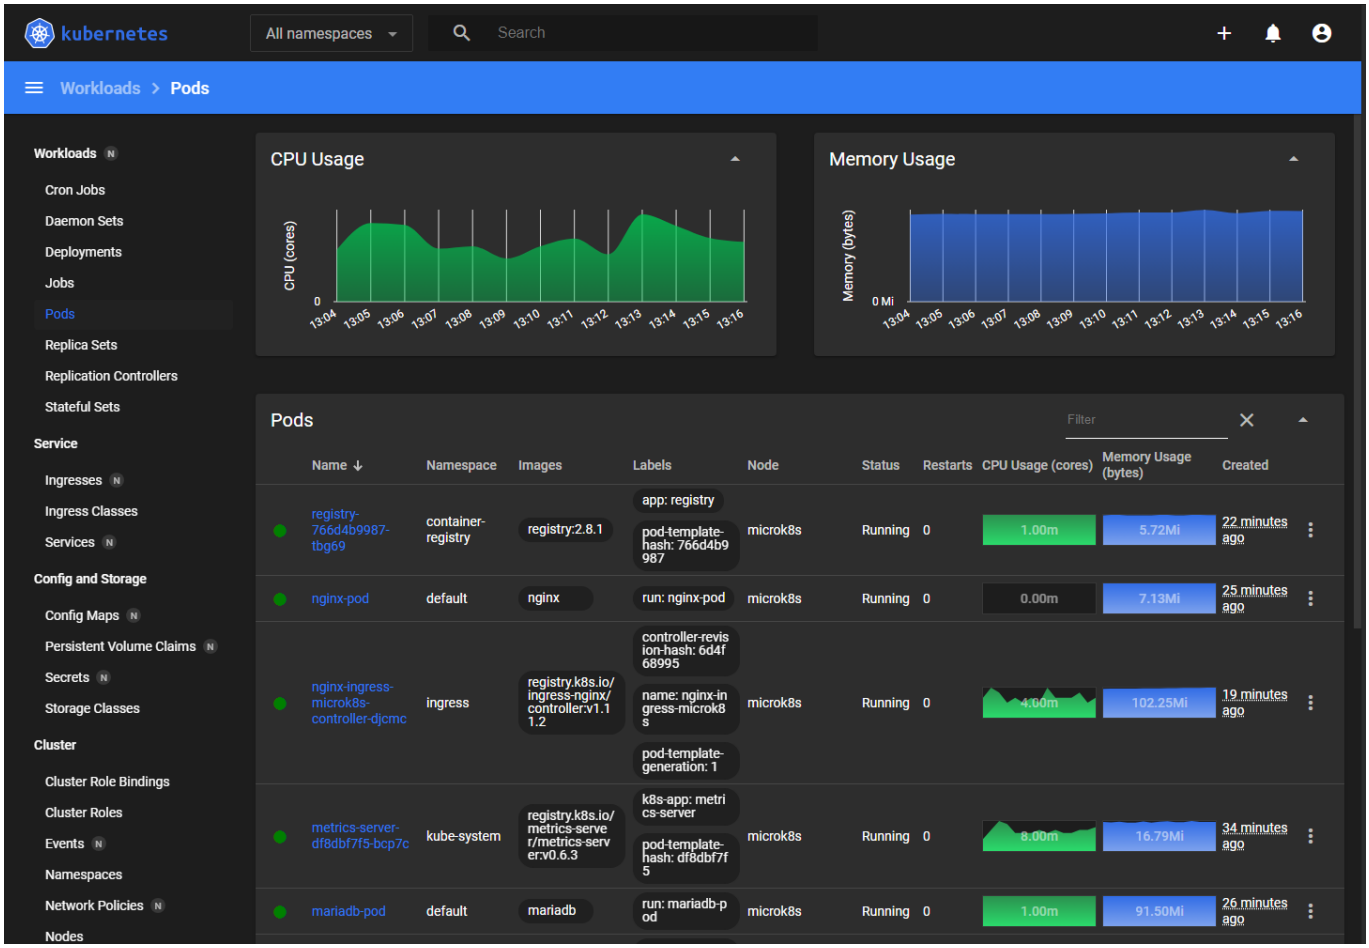
API + CLI

PROXMOX API documentation

Multiuser setups

You may use pools inside Proxmox to separate users and namespaces inside Kubernetes

Kubernetes (MicroK8s)



Hardware Draft

Compute nodes
AMD Epyc
EBS - SD Storage
Ampere / ARM 4x core+

Security

Biometric Readers + card

Man-Trap

Cage or room with Biometric Readers + card

Zero-Trust-Security

Every microservice must not trust to anyone else

Main-Distribution-Frame (MDF)

Incoming and outgoing communication and power lines within a building
A panel or set of panels where all communication cables from different parts of the building are both terminated and connected.
Cage or room with Biometric Readers + card

Intermediate Distribution Frame (IDF)

A wall-mounted or free-standing rack used to manage and interconnect a telecommunications cable between end-user devices and the main distribution frame (MDF).

Meet-Me-Room (MMR)

Network interchange place
Cage or room with Biometric Readers + card

Carrier Hotel

Internet exchange points for an area.

CDN

Content Delivery Network with NGINX or TENGINE

Hardware suppliers & Datacenter vendors

Reuse what's possible and make sense

Hardware	**Datacenter builders**
ASRock Rack	Equinix

Hardware	Datacenter builders
Gigabyte Enterprise	Digital Realty

AWS S3 (replicated across AZs within location), S3 Express One Zone (faster, cheaper only one zone)

Software stack overview

Openstack	**Pros**	**Cons**
	OpenSource,cost-effective	Hard to setup
	Modular design	Modular design
	Ultimate solution for very large clouds	Higher maintenance costs
NASA Hybrid Cloud Amazon AWS and OpenStack, SEZNAM.cz		
AT&T runs its mobile core network on an OpenStack cloud, serving millions of subscribers.		
China Mobile, one of the world's largest telecom providers, is building the biggest NFV network based on OpenStack with over 50,000 servers.		
OpenStack is more alive than ever with 40 million cores in production and over 300 public cloud data centers worldwide.		
Proxmox	**Pros**	**Cons**
	OpenSource,cost-effective	Scalability issues for very large environments
	Easy to setup	approx. 32 servers in group more needs MultiCluster manager
	Multiple HV KVM, LXC	Limited enterprise support
	LXC is very lightweight	Upgrade on OS level
	Integrated SD storage, SD firewall	
	CEPH and ZFS implemented	
	Can consume CEPH from a dedicated cluster	
	Open vSwitch alternative to vSphere Distributed Switch	
	SDN Network alternative to NSX-T Data Center	
OpenNebula	**Pros**	**Cons**
	Multiple HV KVM, LXC, vCenter	
	Kubernetes included	
Nutanix AHV	**Pros**	**Cons**
	Easy to setup	
	Kubernetes Support	Vendor-lock-in
	Integrated storage and networking solutions	Higher cost
Microsoft Hyper-V	**Pros**	**Cons**
	Easy to setup	Cost
		Additional licensing costs!

Openstack	**Pros**	**Cons**
		Vendor-lock-in
VMWare	**Pros**	**Cons**
	Easy to setup	Higher cost
		Additional licensing costs!
		Vendor-lock-in

CEPH	**Pros**	**Cons**
	No single point of failure	Complex
	Data durability via replication or erasure coding	minimum 8nodes+ recommended
	No interruption of service from rolling upgrades, online expansion, etc.	QoS on pool
	A single cluster can serve object, block, and file	
	Compatibility with Openstack, S3, K8s, Proxmox	
Notable known references		
Approx 3500 clusters worldwide with more than 1.5EB capacity		
CERN storage services and its support of experiments, 37000 users 5100 projects in data centers.		
SAMSUNG	CHINA MOBILE	DigitalOcean
My experience from 7.3.2018 in production 18TB MLC AllFlash
